# Errata for
# Learn Physics with Functional Programming

## Scott N. Walck

## February 7, 2024

If a reader of the book knows of additional errors, please send them to me for inclusion in this list.

- p. 578, penultimate paragraph:

  The effectful functions we've written . . . are not really part of the "elegant code" promised in this book's subtitle.

  This sentence refers to an earlier version of the subtitle, "Beautiful Ideas Deserve Elegant Code". While I believe very much in the sentiment expressed in that earlier subtitle, we decided to use a longer subtitle that clarified the role of Haskell.

- p. 582: The web address for gnuplot is misspelled. The correct address is `gnuplot.info`, not `gnuplut.info`. The pdf version of the book links to the correct web page.
